

Storymaker Workshops

Thursday and Friday

12:14-2:14 p.m.

HANDS-ON LEARNING!

FUN & LEARNING!!!

Featured Guest Artist!

What is Story Maker? Story Maker is a teaching tool that allows students in grades 3-12 to create their own animated stories. Teaching students to tell stories using animation is a powerful way to engage them inside the classroom, the same way they are entertained outside the classroom.

Your child will work with a special guest artist to develop, write, pre-visualize, voice record, and assemble original content, using a library of professional-quality animations.

Real Skills, Real Training

Students will learn new skills through storytelling: Skills like writing, communication, teamwork, problem solving and technical skills like editing and sound design. Students will gain hands on experience, which will benefit them throughout their schooling and careers.

Hope to see you at the workshops!
