## What's happening in 8th Grade?

8th Grade students who went on the GATE field trip on December 21st in 2018

Ms. Quinn's students are drawing illustrated poems for art. The students are doing the poems "The Little Boy Lost" and "The Little Boy Found" by William Blake. They are required to do two drawings, one for each poem, but the drawing can be anything that represents the poems.

In Mr. Day's homeroom class they are creating some fascinating apps. There is a game that we are creating it is called Germ Fighter. So basically what you have to do to win is try and dodge the germ because you're white blood cells, those don't mix, so try to dodge the germ and you win. We also have another app called Build a Body what you have to do is in the title you have to put all the organs back in its place it is pretty cool. Makayla Molina says, "I mean, It's fun yeah". Kids in Mr. Day's seem to really enjoy the environment of App Creators. Kailee Mitchell says, "It's easy at first but after the first assignment they don't tell you how to do it. It's hard for inexperienced coders to do it."

In Summey's Homeroom we are currently taking on notes on a award winning history book. Named " A History of Us" This book is very engaging and doesn't bore you like the average history book. We are currently on chapter 5. In art we are currently making 3 faces that are realistic.

Another project 8th grade has worked on is the Holocaust studysync assignment in Ms. Quinn's class. Makayla Molina states, "It's fun to learn about, but I do not think it is very emotional" She had told us later in the interview that she finds it hard to learn about because it can be a little much sometimes. Krystal Bolanos said, "I agree with Makayla, It can be a little much because of the camps and all of the deaths." Gabriella states, "I think it was really a form of ignorance, and extreme racism even though it is a religion and that sometimes dedication can be extremely bad and sometimes certain people should not be determined." Kailee Mitchell says, "It was delusional for the Nazis to think they can create the perfect race by killing everyone else off. The fact that they wanted everyone except for the people with extremely recessive traits is foolish because there is a 25% chance the people won't have those traits, so that would leave about 1 billion seven hundred fifty people left on earth, and the fact they can think all of those people could reproduce people with the same traits is delusional."

## What's happening in 7th Grade?

7th Grade students who went on the GATE field trip on December 21st in 2018

The entire seventh grade had went on a field trip to The Moah Art Museum and LPAC on the BLVD to watch a play called "How To Survive Middle School". Along with those two trips, there is an optional trip to Seaworld happening later on!

In Mr. Jacobson's history class, students are learning about Hinduism. On the other hand, students learning about themes in language arts. They have also finished the story "The Hobbit" and have taken a test on it, and are now reading "The Giver". In art, they are learning about sunsets.

In Mr. Sprague class are learning about Ancient Korea. They are also reading "The Hunger Games" and writing paragraphs and taking quizzes about what they learned about in the story. In language arts, they have just finished learning to write an Argumentative essay. In art they are working on drawing cheetahs and toucans.

In Mr. Cortez they are learning electrolysis in science. In math they are learning how to do one- step equations. They are also working on their hot hands projects with their table partners. This is for. In this project they have to take the temperatures of their tablemates and graph them, then they answer questions about why everyone's temperature us different and what causes us to have different temperatures.

In Mrs. Reynolds class they are finishing up coefficients in math. In Stem they are learning about programming. They are building the pegboard toy in autodesk. In science they are learning physical and chemical change.

## What's happening in 6th Grade?

6th Grade students who went on the GATE field trip on December 21st in 2018

In Ms. Maltby's class, the students are learning how to illustrate a realistic pear that is set on a table.

Mrs. Stephens class are learning to draw a dragon's eye. The students first watch a quick tutorial. They then start off with the actual eye. After the eye is complete, they start around the eye and add scales to it. The students can do many different scales, for example, they can do circles, semicircles, squares, and even some obscure shapes. After the scales are drawn, they are colored with whatever the student chooses.

Mrs. Haser's Class Students will be dissecting frogs and learning about the digestive system. The dissection will begin on Monday January 28.

Ms. Dagama's class are creating and building paper roller coasters. One group is making a "Temple Run" themed roller coaster, while another is making a "Lilo and Stitch" themed roller coaster. Many others have made creative roller coasters.

Have any ideas for newspaper? Bring them in to Mr. Sprague in Rm.7! Add your name and Homeroom so we can credit you! (You can remain Anonymous.)

## What are your New Year's Resolutions?

Many people have New Years resolutions. While some people may have resolutions like losing weight or being outside more, which are primarily for adults, nobody ever asks what kids' resolutions are. Some kids might want to have similar resolutions to adults, or may want something completely different. Do teachers have resolutions for the classroom or personal resolutions they would like to make? The Fulton and Alsbury newspaper Staff have come to ask kids and teachers alike on what they're resolutions are for 2019.

### Resolutions:

- Krystal (8th grade): "To get a Six pack"
- Gabriella (8th grade): "To use my free time to exercise"
- Hannah (8th grade): "To be less awkward"
- Josie (8th grade): "To stop caring what people think about me"
- Aaliyah (8th grade): "Put health first"
- Lauryn (8th grade): "To lose weight"
- Eniyah (7th grade): "To beat my dad at Pacman"
- Mia (7th grade): "To go to a Bts concert"
- Araceli (7th grade): "To stan TXT"
- Serenity 7(th grade): "To stay out of drama"
- Michael (7th grade): "To sleep more instead of read at night."

- Anai (7th grade): "To live my life to the fullest"
- Cindy (7th grade): "No homework and no hard test"
- Sophia (6th grade): "To get good grades"
- Jasmine (6th grade): "Stop yelling at siblings"
- Genesis (7th grade)(Science Olympiad): "To win state"
- Mr. Sprague (7th grade teacher): "To cut down caffeine"
- Mr. Cortez (7th grade teacher): "To stay healthy and to bring more engaging activities to the classroom to excite the students about learning."

---

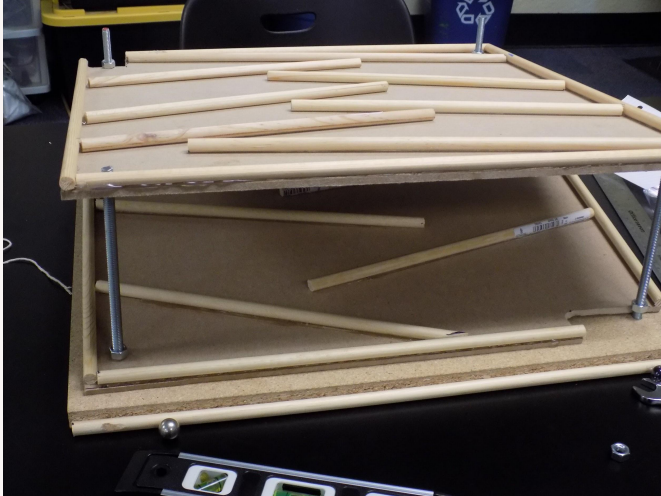

Who knew that some resolutions that kids make would be similar to adults' resolutions. Kids sometime have resolutions that really mean something to them and they want to accomplish them. Maybe these kids will do these resolutions throughout the year, Unlike many adults and kids who don't keep their resolutions.

Have Ideas for the Newspaper? Bring them to Mr. Sprague's (Rm 7) classroom! Make sure to add your full name and your homeroom class.

## Club Updates!

Science Olympiad Roller Coaster

### **Science Olympiad update:**

Science Olympiad members are working very hard and with lots of effort to be prepared for their next competitions. Members are on computers doing what they need to do in order to win. The date of their competitions are down below.

Inventationals  
December 15th  
2018

Regionals-  
January 26th

### **Interviews**

#### **Anonymous:**

*What are you working on in Science olympiad:*  
"Disease Detective"

*Would you recommend it to other people if so why:*

"Yes I would, it teaches you a lot of skills you can use in school."

*What is your favorite thing about Science Olympiad:*

"Potions and Poisons"

#### **Katherine (6th grade):**

*What are you working on in Science olympiad:*  
"Fossils"

*Would you recommend it to other people if so why:*

"Yes, I would recommend, you get to learn new things. It also helps you be good at science in school"

*What is your favorite thing about Science Olympiad:*

"Fossils"

#### **Mikey (7th grader):**

*What events are you doing:*

"Mystery architecture, crime busters, and circuit lab"

#### **Evelyn (7th grade):**

*What are you working on in science Olympiad:*

"Anatomy and physiology, excretory, cardiovascular, and lymphatic system."

*Would you recommend it to the people if so why:*

"Yes, because if you do you get the chance to learn new things including science. So if you love science, Science Olympiad is perfect for people that love studying science."

*What is your favorite thing about science olympiad:*

"My favorite thing about science olympiad is the learning environment and the interesting things we get to learn based on our events."

If you want to have your poetry featured, Bring it to Mr. Spragues (Rm 7) Classroom! (Add on an "About the author" bit and write a short paragraph about yourself.)

## Imperfection

### Imperfection

An impossible goal  
So hard to achieve  
Thinking we can reach it  
If we just believe

But what's wrong with a defect  
Not much I would say  
Literally no one is perfect  
Imperfection over perfection any day

E'Niyah Berry

I am a 7th grade student in Mr. Sprague's homeroom. I wrote this poem because I really just felt like it.
